Sonoma Forge products pictured in this catalog are captioned with their part numbers from the price book. The last letters designate the finish code shown. Our products are available in a wide array of finishes however, four finishes are standard across most collections. They are:

Rustic Copper (RC) Rustic Nickel (RN) Satin Nickel (SN) Oil Rubbed Bronze (ORB).

Exceptions are listed in the collections where they apply. Special order finishes are available upon request.

The product colors you see are as accurate as current photography and printing techniques allow under variable lighting conditions. We recommend visiting a local showroom to select product model and finish.

THE WATERBRIDGE COLLECTION

Classic Sonoma Forge

The distinctive lines of WaterBridge faucets are a beautiful blend of raw plumbing parts and your choice of an Asian-inspired waterfall spout or the more industrial elbow spout. Our popular WaterBridge Exposed Shower systems make bathing a luxurious experience. Complete the suite with coordinated accessories.

THE WHEREVER COLLECTION

WATERFALL SPOUT

THE **WHEREVER** COLLECTION

Our Most Versatile Collection

Based on the same industrial aesthetic as the WaterBridge Collection, the Wherever Collection is simply a wide spread version that employs independent controls which can be installed "wherever" you desire. Paired with your choice of waterfall spout, gooseneck spout, elbow spout and cap spout, this collection offers you ultimate flexibility.

THE **CiXX** COLLECTION

Each is Hand-Hammered and Unique

Celebrating a blacksmith's labor of forming metal into one-of-a-kind, hand-forged pieces of art, the CiXX Collection exudes a rugged muscularity that stands alone among the many look-alike styles available today. The CiXX suite is a truly unique collection "Like nothing else in the showroom!"

THE CIXX COLLECTION

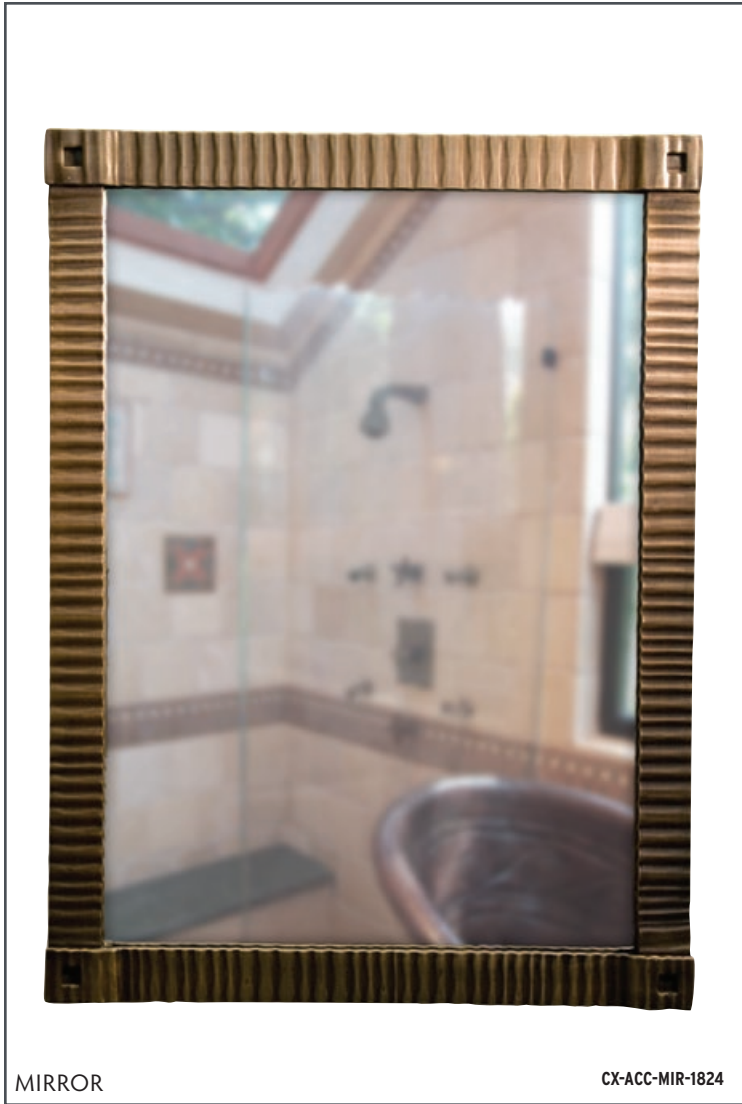

CONCEALED SHOWER SYSTEM

The CiXX Collection is Sonoma Forge's claim to fame. Featuring the original impressions of the blacksmith's 12-pound hammer, its uniquely distressed surface texture summons memories of the forge from a bygone era. Now cast from original masters, every part that comprises a faucet, tub-filler, shower and bath accessory is hand-finished so each piece is distinctive.

THE **STRAP** COLLECTION

Industrial Chic

The Strap took its inspiration from humble yoke fasteners that integrate seamlessly with sleek cylinders for a tone of strength and simplicity. Accentuated by a split-finish of Satin Nickel and Satin Black, this collection says “contemporary,” while retaining its industrial signature.

THE BRUT

WATERFALL SPOUT

THE BRUT

From The Wine Country

The Brut Collection pays homage to our surroundings here in Sonoma Valley and the familiar scenes of laboring in the vineyards & wineries, followed at the end of the day with a rewarding glass of sparkling wine. Its designs soften the rough edges of raw plumbing parts with elegance and ease with a restrained design that is enhanced by our Waterfall or Elbow spout.

SANS HANDS SENSOR FAUCETS

Who Says Sensor Faucets Have To Be Boring?

Featuring any of Sonoma Forge's spout designs, the system has no visible sensors, and no reliance on faulty, infra-red. Our Sans Hands sensor faucets utilize state-of-the-art, hands-free technology based on a magnetic field created from a low voltage current running through the spout's metal. The system is activated when your hand approaches the spout and breaks the field, providing a smooth, sanitary experience along with the stylish and streamlined look.

KITCHEN & BAR FAUCETS

Putting A Little Muscle in Your Kitchen

Like the way your Sonoma Forge faucets and showers look in the bath? Now that same aesthetic brilliance can enhance the kitchen environment. Following the very popular Brut Collection of lav faucets, the Brut with pull-out spray (facing page) marches proudly into the kitchen. The Brut with pull-out spray is a real work horse that employs a dual-spray function in the wand. Completing the kitchen suite are Point-Of-Use faucets (pg 56), Brut Prep faucet (Pg 57), plus air gaps, air switches and soap pumps for a perfectly coordinated look. Additional styles are available in our other Collections, such as the WingNut (above and pg 60-61), WaterBridge (pg 58), The Cuvée (pg 58-59), and The BrownStone (pg 58, 62-63).

POU-GN-C-SN

POU-GN-H-SN

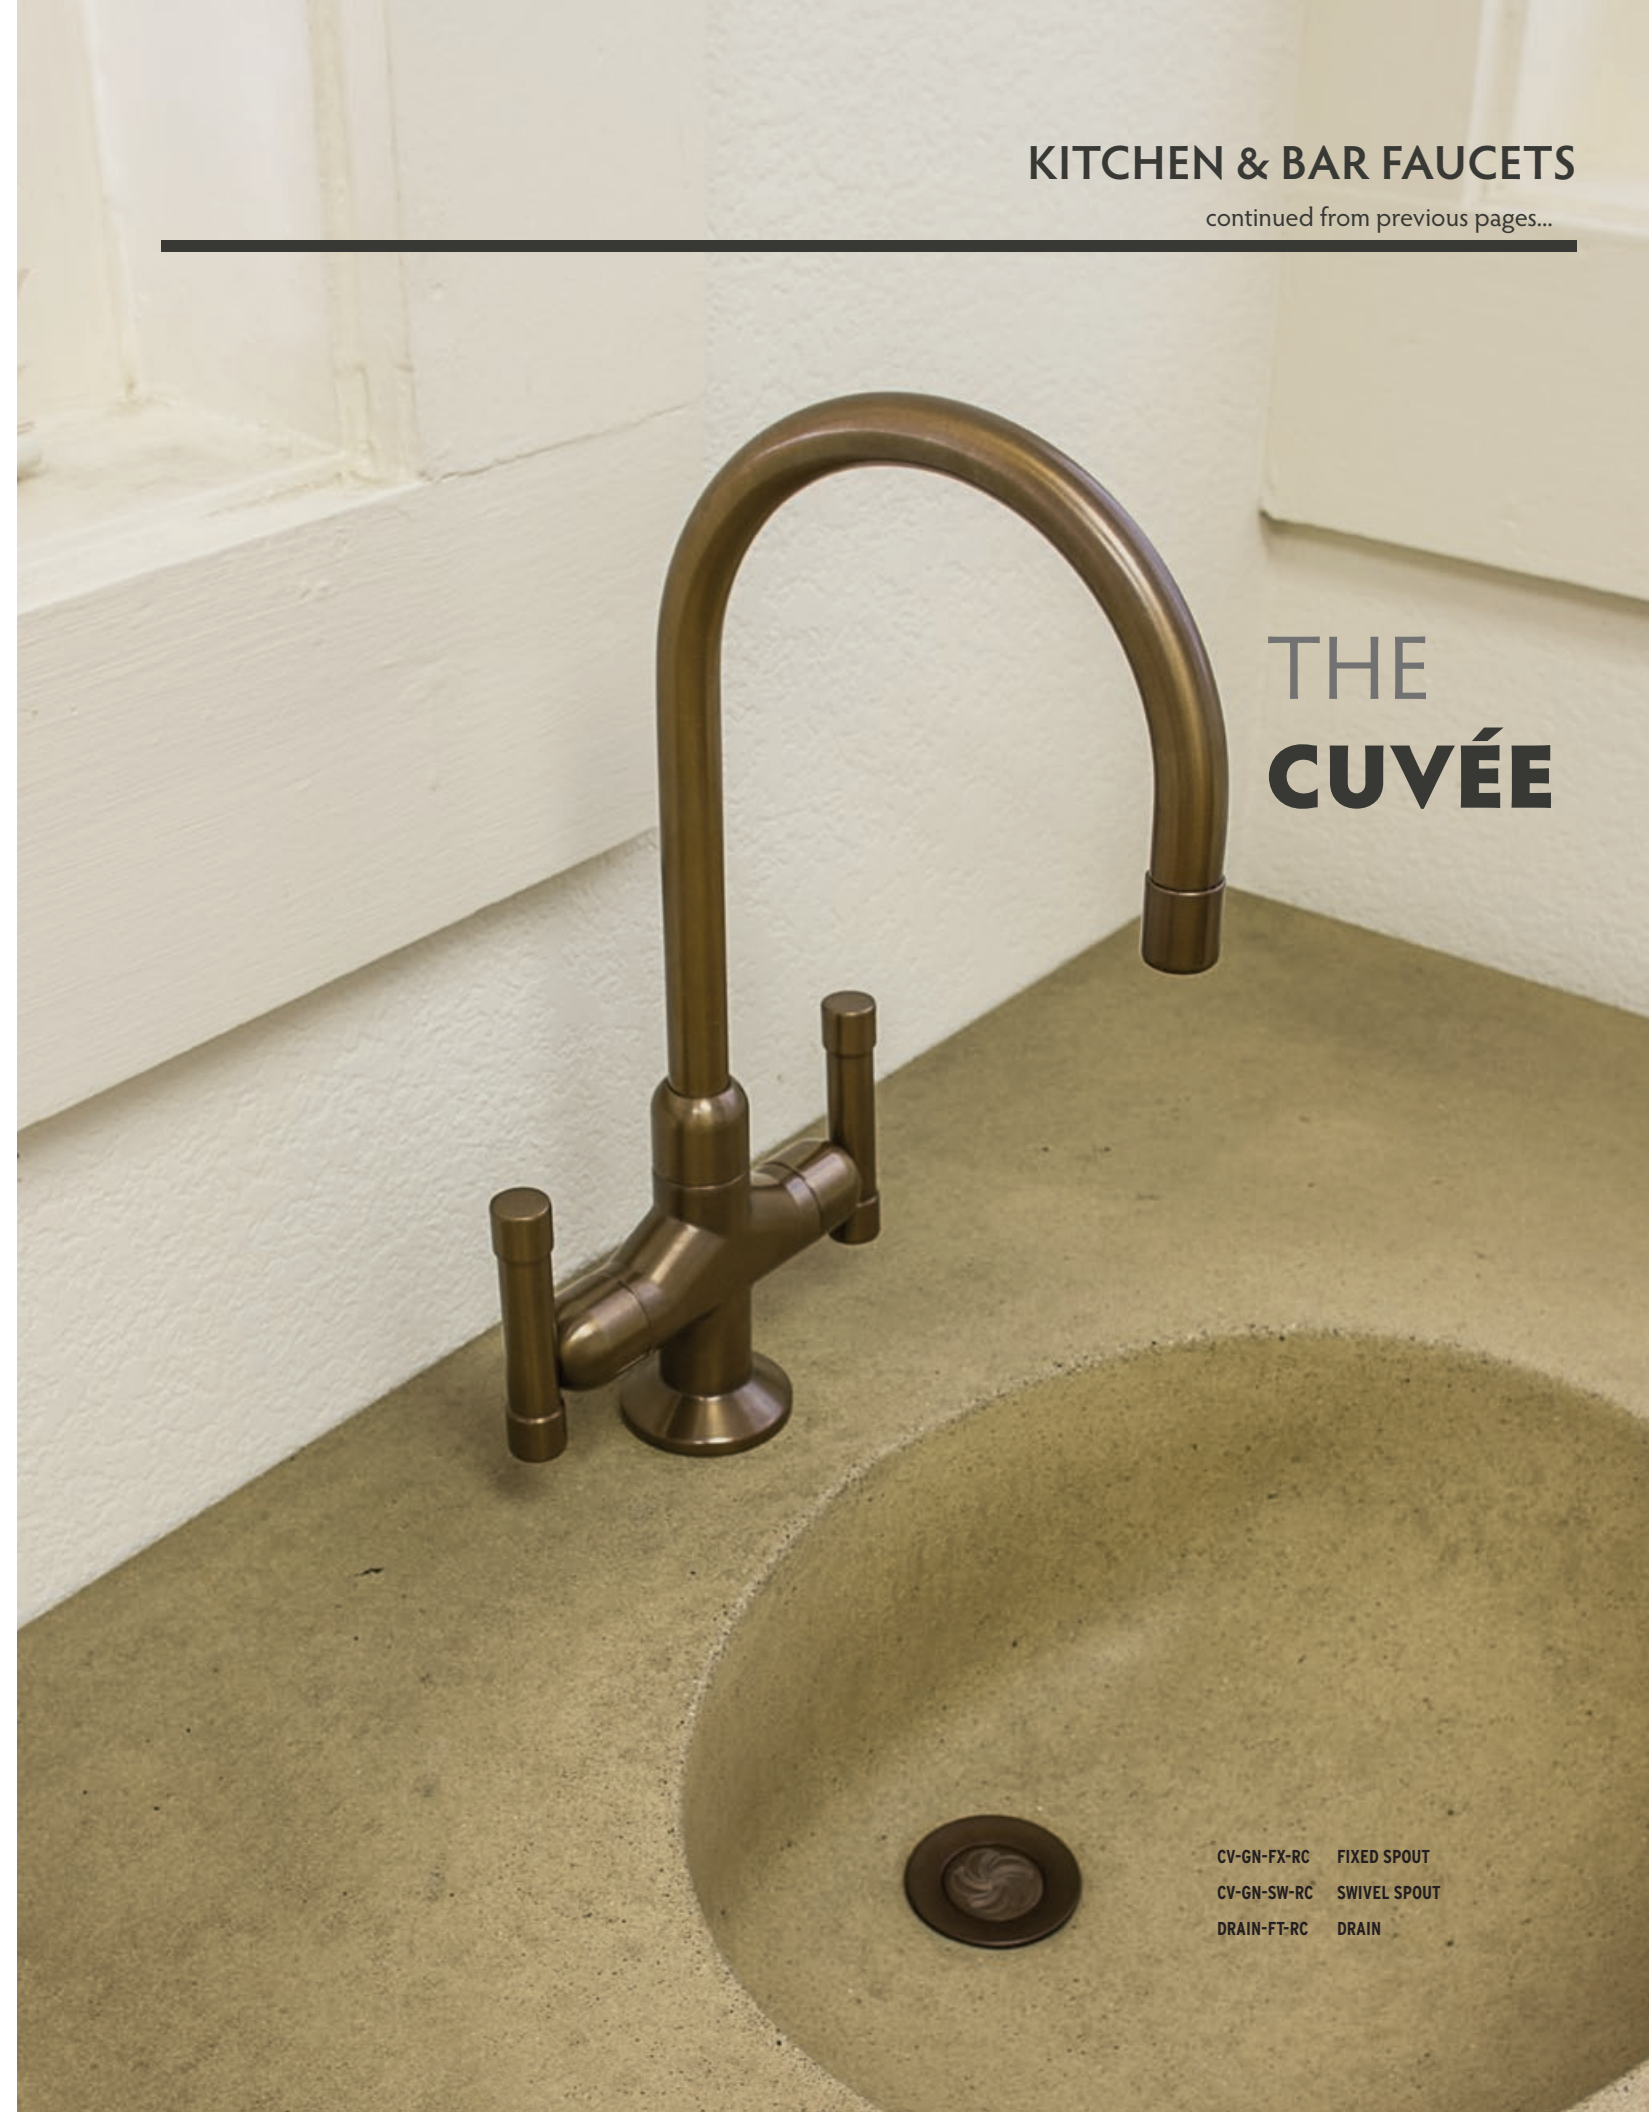

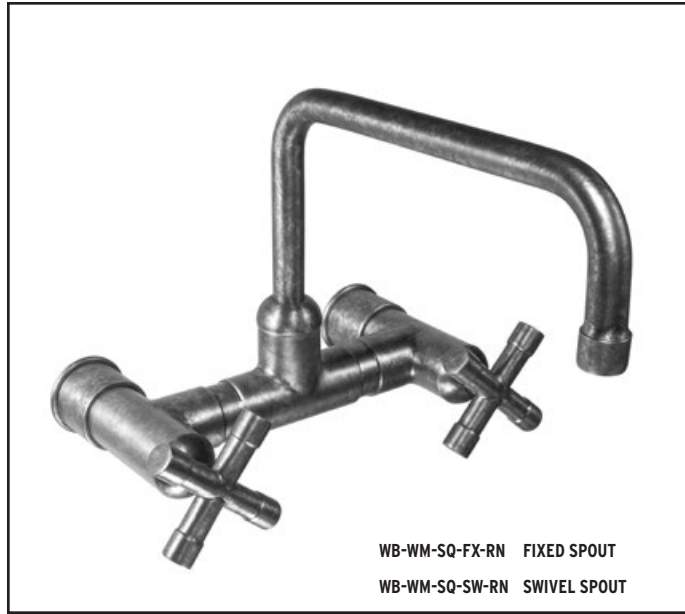

BRUT-PREP-RN

PREP & POINT OF USE FAUCETS

The **Brut Prep** faucet provides service and convenience to kitchen islands and wet bars while complementing the larger kitchen faucet with pull-out spray. Its compact design features a swiveling Elbow spout (shown above).

Point-of-Use water treatment systems are becoming increasingly popular, and with good reason. Sonoma Forge combines well-executed design with quality materials that ensure safety and purity (facing page). Offering two spout designs, they are compatible with most water treatment systems currently on the market.
