

Sonoma Forge

Exposed showers complement the faucets in the WaterBridge Collection in floor-mount and wall-mount configurations. (wall-mount shown with matching robe hooks and soap dishes) Distinctive WaterBridge lines elevate raw plumbing parts to designer status. Expanding on our popular WaterBridge exposed shower systems with independent hot/cold volume controls, Sonoma Forge also offers Thermostatic systems (shown) with the added convenience of presetting the water temperature. The desired mix of hot and cold water can be set at the temperature you enjoy - ready to turn on to when you're ready to bathe. CalGreen compliant. Forged in America. photo by Robert Benson Photography, design by Haver & Skolnick Architects
